Elizabeth Y. Kay-Im
Section Manager
Instrument Software and Science Data Systems

Elizabeth Kay-Im is NASA Jet Propulsion Laboratory's section manager for the Instrument Software and Science Data System Section (388). She has been at JPL for more than 20 years, focusing on developing the new generation of Science Data Systems that are scalable and reusable across earth, planetary, and astrophysics missions, reinforcing and expanding JPL's core competencies in science data collection, processing, analysis, archiving, and distribution. Elizabeth advanced through management positions as technical group leader of the Image Processing System Integration and Test Team, technical supervisor of the Instrument Product Software Development Group, deputy section manager of the Modeling and Data Management Systems Section, and was appointed to her current position in October 2007.

Elizabeth Kay-Im holds bachelor degrees in math-computer science and business administration from Whittier College.
